DGH-5000e

[For price please contact us](#)

A-Scan unit with graphic display and IOL power calculation software. All A-scans and A-Scan/Pachymeter combination units include firmware module with SRK II, SRKT, Holladay Dioptimum and Binkhorst II formulas. All model DGH 5000e and DGH 5100e are equipped with corneal compression detection software reducing the possibility of short readings.

Standard Features:

- Multiple doctor configurations
- Live waveform display
- Consistent, operator independent measurements
- Proprietary pattern recognition algorithm eliminates corneal compression readings
- Intuitive, user friendly interface
- SRK/T, SRK II, Holladay, Binkhorst II formulas
- Stores programmable data for eight IOLs
- Internal graphics printer
- Solid tip, 3mm diameter probe
- Audible guidance to axial alignment
- Automatic and manual gain control modes
- Automatic measurements - no foot switch
- Can be upgraded to add Pachymetry
- An upgrade of a water immersion option, using the Prager Shell is available on all Model DGH 5000es and DGH 5100es.
