## QuickRinse - Automated Instrument Rinsing System

[For price please contact us](#)

The QuickRinse Automated Rinse System from AOI offers an efficient, timesaving alternative to the use of syringes for instruments that require rinsing. AOI's patented pressurized bottle system administers fully automated cycles of fluid and air, standardizing post-surgical instrument care.

- Standardizes post-surgical rinsing prior to sterilization
- Designed for phaco U/S and I/A handpieces, cannulas, vit cutters, reusable tubing, and other lumen instruments
- Fully automated cycles for fluid and air with manual override feature
- Compact, lightweight, and portable
- Disassembles easily for sterilization
- System includes adapters, nozzles, and cleaning brush
- Optional waterproof footpedal offers "hands-free" operation
- Optional carrying case for QuickRinse system and accessories
